

Kelas : B

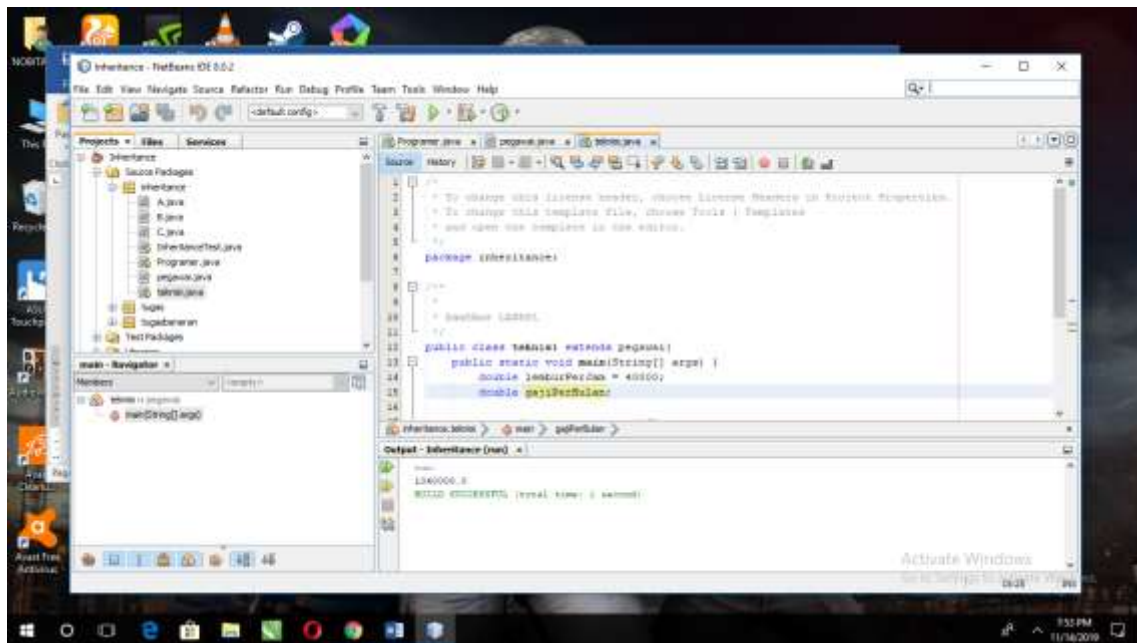

The screenshot shows the IntelliJ IDEA IDE with a Java project named "Inheritance". The main editor window displays the "Programer.java" file, which extends the "Pegawai.java" class. The code defines a "Programer" class with a "main" method that creates a "Pegawai" object, sets its salary and skill level, and prints the skill level. The left sidebar shows the project structure with packages "Inheritance" and "Test Packages", and classes "A.java", "B.java", "C.java", "InheritanceTest.java", "Programer.java", "Pegawai.java", and "Inheri.java". The bottom status bar indicates "Active Windows: 11/14/2018 1:49 PM".
